

Do You Want to Challenge Your Child?

HOW ABOUT LEARNING the GAME of BRIDGE?

Encourage Your Child to Play Bridge!

Does your child enjoy playing games or doing puzzles? Has he/she tried chess? If your child likes to challenge their mind, then Bridge might be their game.

Bridge is a card game played with a partner and four people. It is easy to learn how to play, but playing the game well is challenging. You can improve your game with lessons and practice. Students of Bridge learn a language that is spoken internationally by other players. You can participate in tournaments locally, throughout the United States and abroad. Bridge helps sharpen your brain. It improves memory, concentration and judgment. It develops logical thinking and decision-making skills. It enhances teamwork and social skills.

If Bridge can do all that, can be it be fun as well? Yes indeed! Playing bridge will teach your child to become more focused and do even better in school.

- Where:** The Bridge Center of Buffalo
3362 Sheridan Drive (corner of Sweet Home and Sheridan) on the second floor
