

DO YOU WANT TO CHALLENGE YOUR CHILD???

HOW ABOUT LEARNING the game of BRIDGE???

Does your child enjoy playing games or doing puzzles? Has he tried chess? If he likes to challenge his mind, then Bridge might be his game. Bridge is a card game. You have a partner and play with four people. It is easy to learn how to play Bridge, but playing Bridge well is challenging. You can improve your game with lessons and practice. Students of Bridge learn a language that is spoken internationally by other players. You can participate in tournaments locally, throughout the United States and abroad.

Bridge helps your brain. It improves memory, concentration and judgment. It develops logical thinking and decision-making skills. It enhances teamwork and social skills. If Bridge can do all that, can be it be fun as well? Yes indeed! Playing bridge will teach your child to become more focused and do even better in school.

ENCOURAGE YOUR CHILD TO PLAY BRIDGE WITH US
